#### **COST ESTIMATE BREAKDOWN**

#### **Erosion Control at S-59 and C-31 Conveyance Improvements Cost Estimate**

| Demolish old Structure and Build a New Spillway | \$23,731,532 |  |
|---|--------------|--|
| S-59 Electrical Work                            | \$743,497    |  |
| C-31 Canal Widening, Including Rip Rap Work     | \$ 8,412,576 |  |
| Total Construction Cost                         | \$32,887,605 |  |
| Total Construction Cost                         | \$39,308,208 |  |
|   |              |  |

#### **S-58 Structure Enhancement Cost Estimate**

| Removal of the existing structure  | \$4,568,189   |
|--|---------------|
| Addition of 2 (two) gated spillways with fully remote operation capability         | \$31, 346,062 |
| Purchase of two-way temporary pump(s) and permanent installation of pump platforms | \$ 6,631,180  |
| Total Project Cost   | \$42,545,431  |

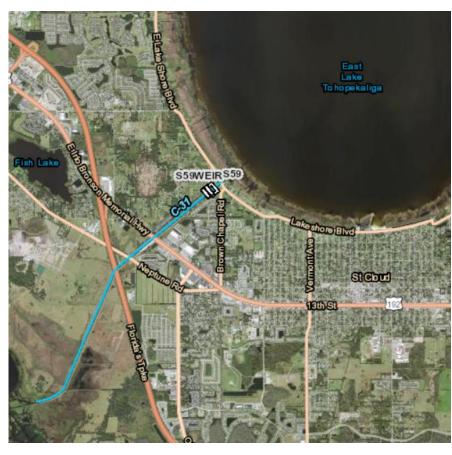

#### S-61 Spillway Enhancement Cost Estimate

| Existing S-61 Demolition and Removal                        | \$4,568,189  |
|---|--------------|
| New S-61 Two (2) Gated Spillway, including Canal Excavation | \$31,346,062 |
| Repairing The Scour Hole in S-61 Boat Locks                 | \$4,113,361  |
| Total Project Cost  | \$40,027,611 |

## S-59 STRUCTURE ENHANCING AND C-31 CANAL CONVEYANCE IMPROVEMENTS

This resiliency project is mainly tied to the District's mission to provide flood control. The S-59 structure is a gated spillway on the C-31 canal at the outlet of East Lake Tohopekaliga in Osceola County

in the Upper Kissimmee Chain of Lakes. structure can be remotely operated from the SFWMD Operations control center. The structure has a design capacity of 590-820 cfs and is operated to maintain optimum stages in the upstream C-31 Canal and in East Lake Tohopekaliga. The structure is operated in accordance with USACE Water Master Control Manual for Upper and lower Kissimmee basins, focusing East the Lake Tohopekaliga Regulation Schedule which ranges 55.0-58.0 between NGVD. The C-31 canal is 3.9 miles long and connects East Lake Tohopekaliga to downstream the Tohopekaliga to the south. The C-31 canal design elevations are 52.0-55.0 ft.

NGVD. The two major sources of inflow to Lake Tohopekaliga are Shingle Creek and C-31 Canal.

As a result of Hurricane 2022 Ian's heavy rainfall, equivalent to more than 200-year recurrence frequency for the region, water levels at East Lake Toho stayed above the safe development line stage of 59 ft. NGVD for approximately 25 days (Figure 9-20). During Hurricane Ian, temporary pumps were deployed to facilitate the conveyance between East Lake Toho and Lake Toho for the period of 10/01/22 to 10/31/22 with daily flow rates as high as 290 cfs.

As part of response actions, it is recognized that this structure needs to be upgraded to include an additional gate to address the single-gate vulnerability issue, along with an improved erosion protective measure that would not constrain the capacity at this structure and canal conveyance improvements. The currently proposed measures include removing existing structure and adding 2 (two) gated spillways and enhancement of the sheet pile weir with a more robust stilling basin with flow deflector and associated rip rap. Such design would remove major structure capacity limitations and potentially can result in a structure that has no maximum Allowable Gate Openings (MAGOs) constraints. Additionally, conveyance improvement along the C-31 conveyance is being proposed, especially as C-31 enters Goblet Cove in West Lake Toho and include canal dredging (deepening) and riprap augmentation. The Osceola Parkway expansion project includes widening of the Partin Settlement Rd near C-31 Canal, and Coordination with FDOT is recommended.

## Osceola County Local Mitigation Strategy Project Scoring Worksheet

Project Title: SFWMD- S-59 Structure Enhancement and C-31 Canal Conveyance Improvements

Agency: South Florida Water Management District Date: August 10, 2023 Score: 42.24

The LMS Project Scoring Worksheet was developed by the Project Prioritization Subcommittee using the STAPLEE (Social, Technical, Administrative, Political, Legal, Economic, and Environmental) framework, which has been established as a best practice in hazard mitigation. Following this framework ensures that a thorough evaluation of each project is completed before it is submitted for funding and all potential impacts are taken into consideration. The Project Scoring Worksheet is designed to assist the LMS Working Group with project prioritization by ensuring that projects meet minimum eligibility requirements and by providing a reference score derived from an analysis based on the established criteria. The score is to serve only as a reference for the LMS Working Group when prioritizing projects, and alone does not determine project eligibility or prioritization.

| Category   | Description  | Score |  |
|--|--|-------|--|
| Hazards addressed  | 2 – Addresses 2 or more hazards  |       |  |
| Hazarus addressed  | 0 – Addresses 1 hazard   |       |  |
|  | 4 – Hazard Reduction   |       |  |
| Benefit to community   | 3 – Preparedness Against Hazard  |       |  |
|  | 2 – Mapping and Regulatory   |       |  |
|  | 1 - Public Information   |       |  |
| Scope of Benefits  | 1 – Project serves 2 or more jurisdictions   |       |  |
| scope of Benefits  | 0 – Project does not serve multiple jurisdictions  |       |  |
|  | 4 – This project could affect over 250,000 people and/or major portions  |       |  |
| Population benefited   | of the county population   |       |  |
|  | 3 – This project could affect between 50,000 and 250,000 people  | 3     |  |
|  | 2 – This project could affect between 1,000 and 50,000 people  |       |  |
|  | 1 – This project could affect less than 1,000 people   |       |  |
| D  | 2 – Project benefits a critical facility   | 0     |  |
| Benefit to critical facilities   | 0 – Project does not benefit a critical facility   |       |  |
| D. C. L. C.  | 2 – Project benefits critical infrastructure   |       |  |
| Benefit to critical infrastructure   | 0 – Project does not benefit critical infrastructure   | 2     |  |
| 6 11/4   12/2   1   6   1   6   1  | This category is scored using the Social Vulnerability Index (SVI)   | 5.24  |  |
| Social Vulnerability Index of community benefited  | provided with the FEMA National Risk Index. (Score = (SVI/100) *6)   |       |  |
| Direction of the state of the s | 4 – No disruption  |       |  |
| Disruption to established neighborhoods and/or   | 2 – Minimal disruption   | 4     |  |

|  | 4 - High - Expected to last/address hazards for 40 or more years   |       |  |
| Lifespan of mitigation measure   | 2 - Medium - Expected to last/address hazards for 20-39 years  |       |  |
|  | 0 - Low – Expected to last/address hazards for less than 20 years  |       |  |
| Community Rating System  | 1 – Project supports CRS elements  | 100   |  |
|  | Samuel Communication of the Co | 1     |  |

### Osceola County Local Mitigation Strategy Project Scoring Worksheet

| Total  |   | 42.24 |  |
|--|---|-------|--|
| Project benefit to floodway/floodplains            | <ul> <li>4 - Project benefits publicized floodway</li> <li>2 - Project benefits mapped floodplains</li> <li>0 - No impact on floodplains</li> </ul>   | 2     |  |
| Complexity/Technical Feasibility                   | Factors for complexity:  • Time involved for planning and/or completion  • Involves coordination of numerous agencies and/or jurisdictions  • Permitting (Type of permitting required or the time period involved)  • Difficulty in obtaining funding  • Requires a public vote  • Requires a public hearing                                  | 2     |  |
|  | <ul> <li>4 - Relatively easy to complete in a short period of time</li> <li>3 - Not very complex based on the items listed below</li> <li>2 - Somewhat complex due to one of the items listed below</li> <li>1 - Complex due to two of the items listed below</li> <li>0 - Complex project due to three or more items listed below</li> </ul> |       |  |
| Funding Availability / Probability of Funding      | <ul> <li>6 – Funding is secured/budget line item</li> <li>3 – Funding sources are available</li> <li>0 – No funding sources can be identified</li> </ul>  | 3     |  |
| Benefit Cost Analysis                              | <ul> <li>6 – Benefit cost analysis is greater than 1.5</li> <li>3 – Benefit cost analysis is 1.0 – 1.5</li> <li>0 – Benefit cost analysis is less than 1.0</li> </ul>   | 6     |  |
| Regulatory Compliance                              | <ul><li>1 – No compliance issues</li><li>0 – Project demonstrates issues with regulatory compliance</li></ul>   |       |  |
| Political support/local champion/public support    | <ul> <li>1 – Project demonstrates documentation of support from an organization other than the submitting agency</li> <li>0 – Project does not demonstrate support from an organization other than the submitting agency</li> </ul>   | 1     |  |
| Consistency with other guiding documents and plans | 2 – Project shows consistency with 2 or more plans 1 – Project shows consistency with 1 other plan 0 – Project shows consistency with LMS but no additional plans (Examples:Comprehensive Plan, Floodplain Management Plan, etc.)   |       |  |

This score was determined by a thorough review conducted by the Project Prioritization Subcommittee. All members of the Subcommittee were afforded the opportunity to provide their input, and the score is representative of their consensus.
